

RECONGNIZING OUR TEAMSTERS ACROSS METRO VANCOUVER

Teamsters in External Relations and Multimedia at the Annacis Research and Event Centre.

Ben Hennessy (Teamsters Local 31 Vice President & Organizing Director), Chris Chong, Cody Biles (Shop Steward), Rich Reynolds, Murwan Salame (Teamsters Local 31 Business Agent).

Our hard-working Teamsters Multimedia Technical Specialists, who are part of External Relations, are based at both Metrotower III and at the Studio located at Annacis Research and Event Centre. The Centre is a water resource recovery research facility and event venue in Delta. This team provides important support to all departments across the organization, which includes live events, online engagements, board and committee meetings, and the setting up of various equipment. Their important work ensures the smooth operations of all departments at MVRD. **Thank you Chris, Cody, Rich, and all of our other Teamsters in External Relations for your great work.**

Teamsters at Seymour-Capilano Filtration Plant (SCFP).

The Seymour-Capilano Filtration Plant (SCFP) treats water from both the Seymour and Capilano sources. The plant is located in the Lower Seymour Conservation Reserve, is the largest water filtration plant in Canada and has the capacity to produce up to 1.8 billion litres per day. The critical operations of the facility and the high quality of the drinking water are dependent on our Teamsters scientists, lab technicians, chemists, and analysts. Your laboratory and facility Teamsters brothers and sisters play a critical role in ensuring that the regions' drinking water is safe. **Thank you Luis, Sarah, Betty, Elvina and all of our other Teamsters at the SCFP for providing such an important service to all of us.**

Luis, Murwan Salame (Teamsters Local 31 Business Agent), Sarah, Betty, Elvina.
