

RECONGNIZING OUR TEAMSTERS ACROSS METRO VANCOUVER

Mindy, Sarah, Mary, Murwan Salame (Teamster Local 31 Business Agent).

The Coquitlam Water Treatment Plant is located north of the City of Coquitlam. It treats about 380 million litres of drinking water each day. The main drinking water treatment processes are ozonation and UV light. The safe and high-quality drinking water that is being delivered to residents and businesses in the region is dependent on our Teamsters.

Mindy: A Program Assistant I and a long-standing Teamster who has been with Metro for over 24 years.

Sarah: A Laboratory Technician and a Teamster for 4 years.

Mary: A Water Quality Control Technician and a Teamster for over 16 years.

Thank you Mindy, Sarah, Mary and all our Teamsters at the Coquitlam Water Treatment Plant, and every Metro location, for all the important and essential services that you provide to your brothers and sisters and to the Metro Vancouver Region .

TEAMSTERS31

On behalf of your Union and President Stan Hennessy, thank you for your hard work and support.
