

# RECONGNIZING OUR TEAMSTERS ACROSS METRO VANCOUVER

Susanna Yik, Nina Geering, Murwan Salame (Teamsters Local 31 Business Agent), Kimmy Tseng.

The Lulu Island Wastewater Treatment Plant is one of five critical facilities that treat over 1 billion litres of wastewater every single day, helping protect public health and the environment throughout the Metro Vancouver region. At the heart of this essential work is an **exceptional team**:

- **Susanna**, Team Lead at the QC Control Lab, and a proud and dedicated Teamsters sister for over **14 years**.
- **Kimmy**, Senior Lab Technician, with over **7 years** of committed service as a Teamsters sister.
- **Nina**, the WWTP Clerk and lovingly known as the *“caring mother of the plant,”* supporting and taking care of everyone for nearly **20 years**.

We extend our **deepest gratitude** to Susanna, Nina, Kimmy, and all the **Super Teamsters** at the Lulu Island plant. Your dedication, professionalism, and teamwork keep our communities safe and healthy every day.

And a **special thank you** to all our incredible **Metro Teamsters members** across the region. Your continued support and solidarity make all the difference.

**On behalf of President Stan Hennessy and your Union, thank you for your hard work and support.**
